2002	180.6	1.6%
2003	184.6	2.2%
2004	189.6	2.7%
2005	196.9	3.8%
2006	203.4	3.3%
2007	208.2	2.4%
2008	219.3	5.3%
2009	215.7	-1.6%
Average ('00 - '09)	-	3.2%

** Current COLA factor

* Average Growth Rate is determined by calculating the annual growth of the 12-month average CPI index from one fiscal year to the next fiscal year.

** Average Growth Rate is determined by calculating the annual growth in the CPI index from the 3rd quarter-average in one year to the 3rd quarter-average in the next year.

World Wide Web address for CPI Index: <http://www.bls.gov/cpi>

Note: The above table and COLA is based on the CPI-U, which is the Consumer Price Index for All Urban Consumers. The Social Security Administration calculates its COLA using the CPI-W, which is the Consumer Price Index for Urban Wage Earners and Clerical Workers. This year, there is no COLA because there was no increase. Visit <http://www.ssa.gov/OACT/COLA/latestCOLA.html> for more information.
