What is the initial vision for the County Technology Clearinghouse?

- To provide affiliates and counties with a mechanism to overcome:
 - Insufficient expertise within many counties to provide strategic direction and vision for technology;
 - Insufficient technology staff resources (or no technology staff) within many counties;
 - Difficulty in ensuring inter-office operability from the citizens' standpoint;
 - Difficulty in coordinating multi-county applications; and
 - Limited resources.**

The County Technology Clearinghouse could provide coordination that should result in three major benefits:

The County Technology Clearinghouse could provide coordination that should result in three major benefits:

- **Savings by counties and county offices working collaboratively;**

The County Technology Clearinghouse could provide coordination that should result in three major benefits:

- Savings by counties and county offices working collaboratively;
- **Savings by leveraging the resources of one project for use by other projects;**

The County Technology Clearinghouse could provide coordination that should result in three major benefits:

- Savings by counties and county offices working collaboratively;
- Savings by leveraging the resources of one project for use by other projects; and
- **Increased and improved services to Iowa residents, particularly in smaller counties, through the development of electronic county services, and by preventing the development of technology silos between various county projects.**

Initial Step

Initial Step

- Establish a County Technology Clearinghouse Advisory Board

Initial Step

- Establish a County Technology Clearinghouse Advisory Board
 - **Each participating affiliates would appoint a member and alternate to the Advisory Board.**

Initial Step

- Establish a County Technology Clearinghouse Advisory Board
 - Each participating affiliates would appoint a member and alternate to the Advisory Board.
 - **All members from participating affiliates could potentially participate in workgroups to develop solutions.**

Assessment

Advisory Board Objectives

Objective One:

Assessment

- Current Technologies

Advisory Board Objectives

Objective One:

Assessment

- Current Technologies
- Business Processes

Advisory Board Objectives

Objective One:

Assessment

- Current Technologies
- Business Processes
 - Document

Advisory Board Objectives

Objective One:

Assessment

- Current Technologies
- Business Processes
 - Document
 - Priority List of Prospective Apps

Advisory Board Objectives

Objective Two:

Develop Strategic Plan

Advisory Board Objectives

Objective Two:

Develop Strategic Plan

Plan would include:

- Infrastructure

Advisory Board Objectives

Objective Two:

Develop Strategic Plan

Plan would include:

- Infrastructure
- Products and Services

Advisory Board Objectives

Objective Two:

Develop Strategic Plan

Plan would include:

- Infrastructure
- Products and Services
- Policies and Procedures

Advisory Board Objectives

Objective Three:

Develop and implement an action plan.

Advisory Board Objectives

Objective Three:

Develop and implement an action plan.

- Work with third party vendors

Advisory Board Objectives

Objective Three:

Develop and implement an action plan.

- Work with third party vendors
- Use priority list

Advisory Board Objectives

Objective Four:

Post-project Assessment

Advisory Board Objectives

Objective Four:

Post-project Assessment

- Measure impact

Advisory Board Objectives

Objective Four:

Post-project Assessment

- Measure impact
