

# Local Government Guide to **CYBERSECURITY**

## **Security Operations Center (SOC)**

Provides cybersecurity threat monitoring and alerting to local governments 24 hours a day, 7 days a week, and 365 days a year.

## **Endpoint Protection and Response Tool**

Security tool that detects and prevents a wide range of known and unknown cyber attacks on computers, servers, and other devices.

## **Enterprise Vulnerabilities Management System (EVMS)**

Security tool that scans computers, servers, and other devices for vulnerabilities that cyber threats can leverage. Reports are generated to assist local governments in prioritizing vulnerability remediation.

## **Cost to Local Government**

The OCIO can assist in identifying funding opportunities to pay for cybersecurity services.

## **Let's Get Started!**

Reach out to the OCIO at: [government.services@iowa.gov](mailto:government.services@iowa.gov) to find out how we can help with your cybersecurity and information technology needs.
